CONFERENCE ROOMS

CLINICS

DAY CARE

## **ACHIEVEMENTS**

### **INTERVENTIONAL NEUROLOGY**

This is a delightful advance in the history of the department with the success of our team of neurologist to do successful catheterisation of 3 patients with Aneurysm ( June 2001 ).

### **THROMBOLYSIS**

See associated CD. The department is well known for research and application of Complete Program for treatment of Acute Brain Attack, including patient awareness T.V. programs and training Programs for emergency.

### **GENETICS OF MUSCLE DISEASE**

#### **Educate to Irradicate**

The establishment of the genetic laboratory has allowed the description of the first cases of Sarcoglyconopathies in Egypt. Now the genetic group is actively involved in a complete Program.

### **TREATMENT OF REFRACTORY EPILEPSY**

Several M.D. studies of chronic epilepsy in Egyptian allowed us to develop our Program for treatment of refractory epilepsy that include video tapes to educate families and T.V. Programs for doctors. Introduction of Vagal Nerve Stimulation For treatment of Refractory Epilepsy February 1998.

## **COLLABORATION**

### **JAPAN**

#### **STUDY OF MUSCLE DISEASES**

Joint Programs with National Institute of Neurology, Tokyo allowed 3 international meetings and 3 training Programs in 5 years.

### **TUNISIA**

#### **STUDY OF HEREDITARY DISORDERS NEUROMEDITARNEAN STUDY GROUP**

The Cooperation include Joint meetings and organising a Joint Project with the Help of European Community to study Friedriech`s ataxia.

### **LYON - FRANCE**

#### **CEREBROVASCULAR**

The Program include joint research, training and joint clinical work.
